

- Professional-grade infrastructure, industry-leading configuration.
- The operation is stable and reliable, and the application scenarios are wide.
- Equipped with 13 megapixel camera for accurate image capture.
- 32G large storage space.
- 4G network communication, reliable data transmission.

H5 is a new generation professional controller running on Android which offers state of the art smartphone capabilities combined with rugged professional quality. And the alphanumeric keypad which gives flexibility for surveyors field work.

H5 as an Industrial controller has rugged cover which reaches to IP67. The device is waterproof and 2m drop proof. The frame of the H5 is magnesium alloy, which is both lightweight and strong. Your data will be protected and the reliability of the device in the most challenging environments.

In addition, the 3400 mAh Li-ion battery fulfills the long time working time need. Protected and secure, the SIM card slots are located under the battery and inside the battery door. Adopting various sensors, like barometers, NFC, gyroscope, E-compass, G-sensor, etc. The powerful network module can provide multiple options and perfect experience of high speed net connection. The H5 can be configured with internal Bluetooth, WiFi, Camera, GPS and cellular functionality. There are even additional options such as bulit-in bar code reader and interphone functions.
