Choose N6s to meet your topographic needs as a superior mate. It offers a clear-to-view onboard system by it's easy-to-use but powerful programs.

Such as:

Offset: angle, distance, column offset  
Set-Out Line: to calculate the coordinate of occupied point based on a known point and line

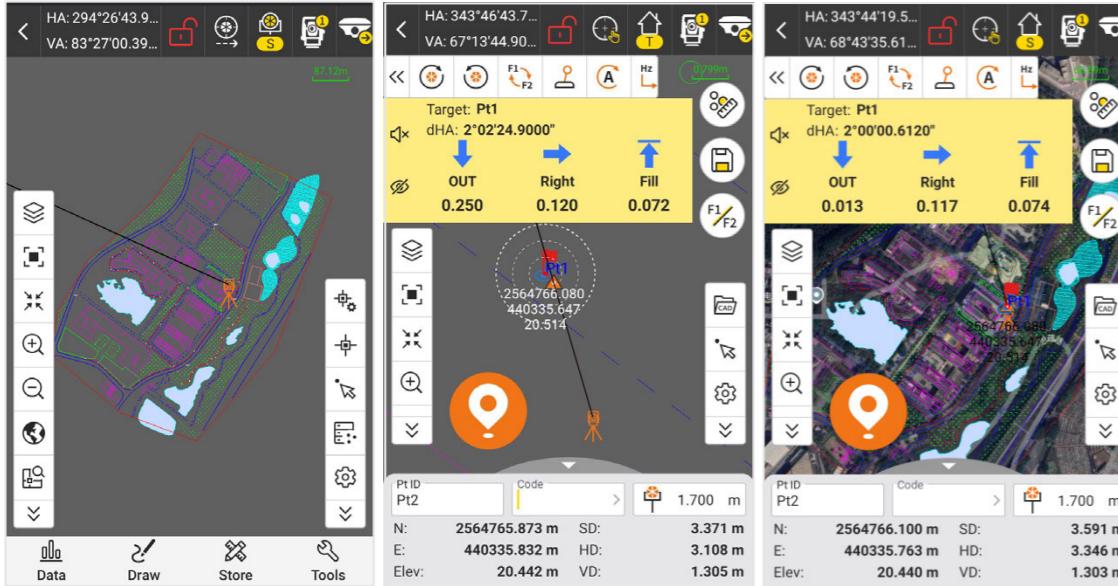

## Work on Data Collector

After added the Bluetooth module on N6s, you will have more possibilities to extend the applications on Total Station. With open source commands, you are easy to establish the communications between the N6s and other software you wish to use.

# Total Station Module of SurvStar App: Four Main Features to Give You More Power & Freedom

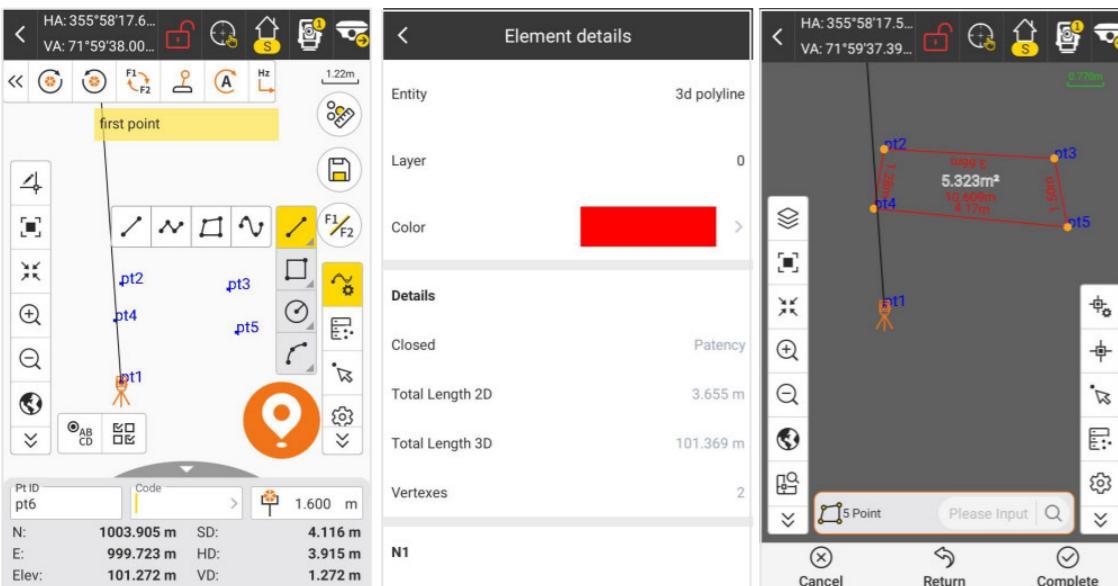

## CAD Stakeout: Increasing Productivity & Decreasing Error

CAD Stakeout allows you to import **CAD basemap** and stakeout it, without input point coordinates one by one.

When you need, you can connect to your local online map and overlap it to CAD basemap, to increase the precision of your job.

## Measure & Draw: Save Time in Both Field work and Indoor Work

User is allowed to draw line, polygon, circle...up to 11 kinds of graphic, while measuring target points. No need to manually draw draft map anymore.

User is allowed to manage different objectives as different layers. The draft map can be saved and output in CAD format, and to be used in indoor works.

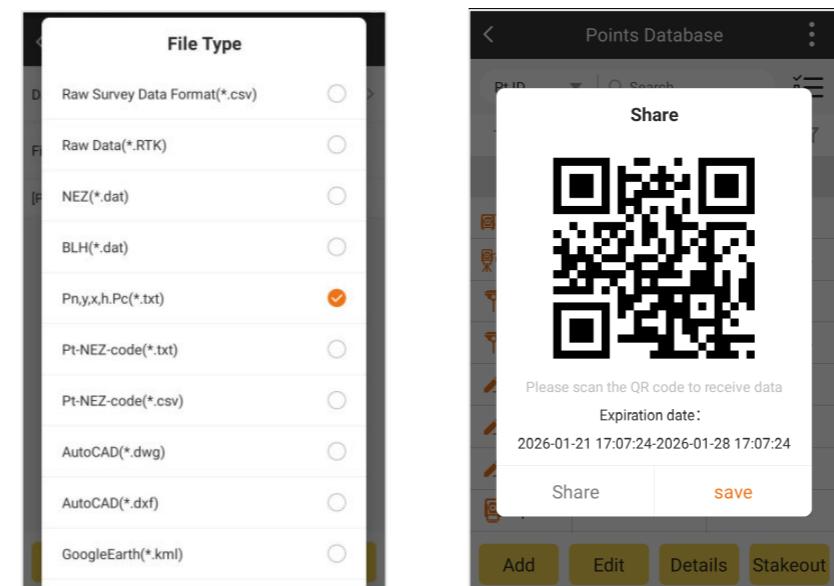

## Point Survey & Stakeout: More Ease and Convenience

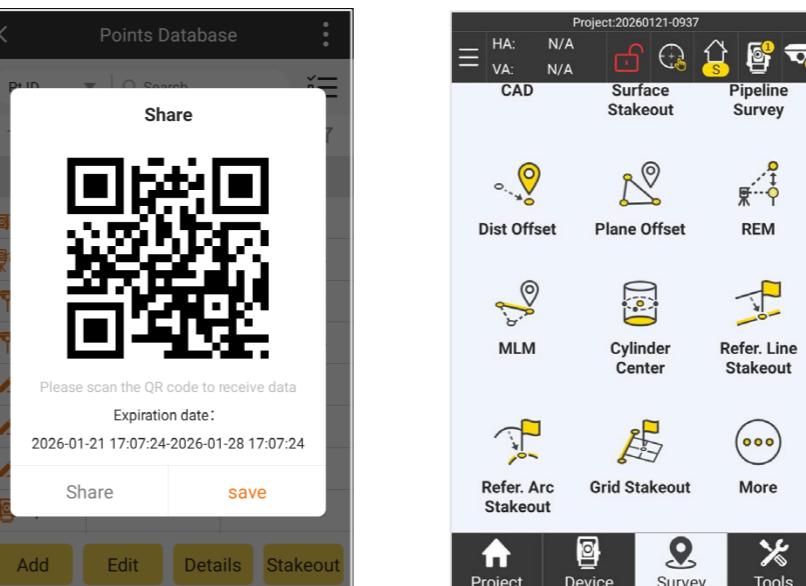

With graphic display, now it is easy to you to observe the relation between occupied point and target points. It will help you to make less mistakes when measuring many points.

The stakeout program screen displays information more completely, indicates target points more intuitively, your workflow will be smoother than before.

## Other Features: More Innovation, No Limitation

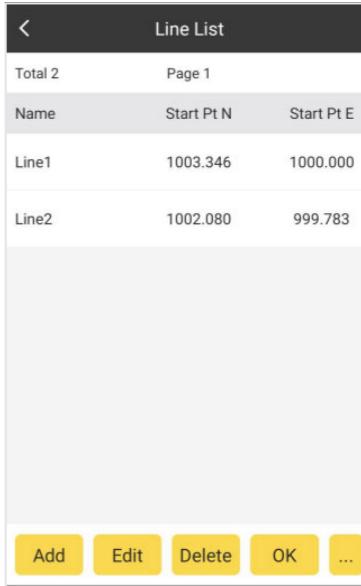

File transfer type (up to 31 kinds of file format)

Can share QR code points

## Line Stakeout: Smarter than Traditional Way

User is allowed to manually choose points from library, line will be formed by program automatically. Then user input interval distance, setout points will be calculated out and displayed on screen.

This function is suitable for road or other objective that is containing lines.
